Mr Steve Bowater, High Power RF  
Faraday Partnership  
Steve.b@powerFaraday.org.uk

The High Power RF Faraday Partnership is a DTI sponsored initiative to promote the flow of technology and people between UK industry and academic institutions for the benefit of both. The Partnership facilitates core research into a wide range of industrially relevant topics. Our current portfolio covers 9 research programmes costing in excess of £2.5 million. Research topics covered include phase locking of magnetrons for accelerator use, gyro travelling wave amplifiers, multipactor, matrix converter power supplies for use in RF systems and pulsed power klystrons.
